Testimonials

I am an IT professional's worst nightmare: a dentist who writes his own web site. Despite this, Dave Wurst accepted the transfer of my site from one of the big hosting companies to his company. He obviously spent a substantial amount time on the process. Despite this, his billing was fair and entirely limited to his original verbal quote.

Dave is the most available, most responsive, and most knowledgeable website IT professional that I have ever interacted with. If you email him, he responds within minutes. That includes evenings and weekends! And he commits phenomenal amounts of time to solving your problems, even though, in my case, he was paid on a straight monthly basis.

I originally shifted the hosting of my website to WebCitz in order to support the local SE Wisconsin economy. That decision has resulted in a direct and responsive relationship with the responsible party (Dave Wurst) that far exceeded my expectations. I will never leave WebCitz as my hosting service.
